HFHT Database

SQL Database Documentation

Hamilton Family Health Team

Contents

Description

This document provides information about tables retrieved from the HFHT SQL Server database. For each table, there is a short description of what information it stores, and the relationships "From" and "To" that these tables might have with others.

The table order in the document reflects the tables we think are most important based on data and Access front-end.

All tables in the database were mapped in this document, including empty tables and copies of tables.

Some tables don't have relationships with other tables. The data might be in use in those tables but since there is no relationship, database integrity cannot be guaranteed.

Tables without relationships

The table below lists the tables that don't have relationships with any other table in the database. This does not mean that the table is not in use. But the data integrity cannot be guaranteed by the database in case of entries in these tables are directly added/removed.

Tables without relationships
dbo.tbl_Practice_Initiatives
dbo.tbl_Allied_Schedule
dbo.tbl_Allied_Schedule_TimePeriod
dbo.tbl_lkp_Action
dbo.tbl_lkp_Dietitian_Groups
dbo.tbl_lkp_Initiative_Type

dbo.sysdiagrams

Description

Internal table that stores database diagrams created.

Columns

Key	Name	Data type	Attributes
PK	diagram_id	int	
	definition	varbinary(MAX)	Nullable
	name	sysname	
	principal_id	int	
	version	int	Nullable

hfht.tbl_Label_No

Description

Store label information.

Columns

Key	Name	Data type	Attributes
	labelNo	varchar(50)	Nullable

hfht.tbl_lkp_Specialized_Role

Description

Store specialized roles (Child & Youth, MHC, etc.).

Columns

Key	Name	Data type	Attributes
PK	Specialized_Role_ID	int	
	Specialized_Role	nvarchar(50)	Nullable

hfht.tbl_Practice_Hours

Description

Store practice hours.

Columns

Key	Name	Data type	Attributes
PK	Prc_Hrs_ID	int	
FK	Prc_Hrs_Prc_ID	int	References: tbl_Practice
